

## **ABSTRACT**

The main aim of this work is to create awareness about Materials Engineering through examples drawn from the ordinary experiences that are common to the Indian culture, thus making the role of Materials in everyday life an easy area to conceptualize. There is an obvious application of Materials Engineering concepts in day-to-day life, as well as significant historical impact on our Indian culture. These concepts are presented in the form of a questions and answers narrative to gain the interest of readers (students) as well as the public. This novel approach will help readers to understand the various concepts easily which can be basis of an illustrating the role of technology and cultural interaction that will help them to remember the same. This kind of practice will aid the individual enormously and enable them to master concepts and themes by themselves.
