Abstract

Dark web is the part of the World Wide Web (WWW) that is only accessible by means of special software, configurations or authorization to access, thus allowing users and website operators to remain anonymous, unidentified and untraceable. The dark web is contrasted with Clearnet, which is the regular web which has unencrypted nature. The deep Web, sometimes called the invisible Web, is the large part of the Internet that is inaccessible to conventional search engines. Deep Web content includes email messages, chat messages, private content on social media sites, electronic health records (EHRs), electronic bank statements, and other content that is accessible over the Internet but is not crawled and indexed by search engines like Google, Yahoo, Bing or DuckDuckGo. The dark web forms a small part of the deep web. 'Deep web' is a term mistakenly used to refer specifically to the 'Dark web'. Communication between darknet users is highly encrypted allowing users to talk, blog, and share files confidentially. Darknet websites are accessible only through networks such as Tor ("The Onion Routing" project) and I2P ("Invisible Internet Project"). The dark net is also used for illegal activities such as illegal trade, forums, and media exchange for pedophiles and terrorists.

Dark Government of Telangana (DGoT) is not part of Dark Web. We use the term DGoT because very few prople in India are aware of it though it had given rise to great artificial impact on Telangana since 2011 and because it was used, similar to dark web characteristic, for illegal activity such as illegal business, forums, and media exchange. Hence, DGoT is also known as Rogue GoT(RGoT). JNTUHJAC served as a wing of it to disrupt the academics in JNTUH in particular and Telangana in general. The Cyberabad police filed FIR 53/2014 in Jan2014 [24-25] against the crimes involving RGoT and JNTUHJAC. The evidence produced by the cyberabad police failed owing to 'hostile witnesses' [28] and the accused in the chargesheet were able to come out scot-free, unscathed. The police failed not only to convict the cybercriminals involved

in the illegal activity of DGoT and JNTUHJAC but also to issue prohibition orders against the twin elusive, cybercriminal organizations DGoT and JNTUHJAC. On the contrary, the police externed Swami Paripoornananda unbecomingly. What is sauce for the goose is sauce for the gander. But the police relented in the case of the twin cybercriminal organizations. Further, we present the Rogue/Dark GoT as a case of JNTUH academic scam.
